PERSONAL

Location

Bugel RT 12/ RW 03 Kedung, Jepara,
Central Java

Date of Birth

12 September 2009

School

SMK Negeri 3 Jepara

Major

TJKT / Computer and Network
Engineering

Target

PKL / Internship in SOC,
Cybersecurity, or IT Security

TOOLBOX

- Linux
- Burp Suite
- Wireshark
- Docker
- Git/GitHub
- Python
- Bash
- Wazuh/Splunk basics
- Web Security
- Digital Forensics

CURRICULUM VITAE

Vocational high school student focused on cybersecurity, secure web development, and security monitoring. I learn by building projects, joining CTF-style competitions, documenting findings, and turning technical practice into practical skills for real environments.

EDUCATION

SMK Negeri 3 Jepara - Computer and Network Engineering (TJKT/TKJ), Class XII

Relevant learning: networking fundamentals, Linux administration, server hardening, web security, SIEM concepts, and incident analysis basics.

CYBERSECURITY FOCUS

- SOC analysis fundamentals: log reading, alert triage mindset, incident documentation, and security monitoring concepts.
- Web security practice: vulnerability analysis, secure validation, authentication/authorization concepts, and CTF write-up style thinking.
- Forensics and systems: Wireshark packet analysis, Linux hardening, firewall rules, SSH, Apache, Samba, and password policy practice.

PROJECTS

PancaRuang - Educational Web Application

Built a web project about Pancasila values with authentication, user accounts, feedback flow, admin dashboard, content pages, and secure validation concepts.

Personal Cybersecurity Portfolio

Published a self-built portfolio website to present learning focus, project links, and cybersecurity direction.

SELECTED COMPETITIONS AND CERTIFICATES

- LKS SMK Jawa Tengah XXXIV 2026 - Participant, Cyber Security / Teknologi Keamanan Siber.
- POLRI CTF 2026 - Participant certificate; team: KTI - Anak Kemaren Sore.
- Techcomfest Capture The Flag Competition 2026 - Participant.
- Skagara Integrity Competency Certificate - passed with 100% score.
- Additional evidence available in Drive: PUSIBERAD, CSC, OJM, IONIC, and TOIEC folders.

WORK / INTERNSHIP EXPERIENCE

No formal internship yet. Currently preparing for PKL placement in cybersecurity, SOC analysis, networking, or IT support roles.

Jepara, 1 September 2026

Human Resources Department
PT Aqrapana Daya Mandiri
Yogyakarta, Central Java

Dear Hiring Manager,

I am writing to apply for the Cyber Security Analyst Intern position at PT Aqrapana Daya Mandiri. I am a Class XII Computer and Network Engineering student at SMK Negeri 3 Jepara with a strong interest in cybersecurity, especially SOC analysis, security monitoring, web security, and digital forensics.

My learning path is practice-oriented. I regularly study cybersecurity through CTF-style challenges, school/community projects, and independent technical practice. I have used tools such as Linux, Burp Suite, Wireshark, Docker, Git/GitHub, Python, and Bash while learning about networking fundamentals, server hardening, secure web development, and log-based analysis.

I also have supporting evidence from competitions and certificates, including LKS SMK Jawa Tengah XXXIV 2026 in Cyber Security, POLRI CTF 2026, Techcomfest CTF Competition 2026, and other certificates stored in my certificate portfolio. Through these activities, I have developed persistence, careful documentation habits, and the ability to learn from technical problems step by step.

I believe this internship would be a valuable opportunity to grow in a professional security environment while contributing my curiosity, discipline, and willingness to learn. I would be grateful for the opportunity to discuss how my background and motivation can support your team.

Thank you for considering my application. I look forward to hearing from you.

Sincerely,

Arjuna Nazril Ramadhan
